SIDE H. 600 CM.	KG	//	//	//	1120	1170	1220	1270	1320

**NOTE:**

- 1) The declared capacities are intended with the first shelf anchored to the 3rd upright slot starting from below.
- 2) The shelving must be strictly fixed to the wall. When this is not possible, anchor with top tie rods. Contact the technical office for the correct configuration or for any particular condition of use.
- 3) The load must be evenly distributed from bottom to top and the shelves must be mounted as equidistant from each other as possible.  
 Consult the shelf capacity table to avoid exceeding the total load on the shelves of a single span, related to the capacity of the corresponding uprights.  
 Please contact the technical office for the correct configuration.
